波纹状金属板 (CSM-Corrugated sheet-metal) 由钢铁或铝制成, 按照各种大小比例排列成型的波纹可以持续使用, 美感的外观经久不衰。波纹状金属板 (CSM) 曾被德绍容克斯飞机公司推选为制首批和最大的舰队商用飞机的最佳材料, 之后高端耐用的旅行箱的标准外观也采用了这种经典波纹设计。

Corrugated sheet metal (CSM) is made of steel or aluminum, and the corrugations arranged in various sizes and proportions can be used continuously, which brings enduring aesthetic appearance. CSM was once selected as the best material for making the first and largest fleet of commercial aircraft by the Dessau-Junkers Flugzeug-und-Motorenwerke AG in Germany. Later, the classic corrugated design was also adopted as the standard appearance of high-end and durable suitcases.
